Technical information: (816) 285-7000 • BLSInfoKansasCity@bls.gov • www.bls.gov/regions/mountain-plains

Media contact: (816) 285-7000

Incorrect prices for prescription drugs were used for the CPI-U and CPI-W indexes from May through August 2016 in a number of areas. Several indexes were affected, including the all items and medical care indexes. A list of the series affected can be found at www.bls.gov/bls/errata/cpi-price-corrections-10182016.htm, and the corrected data are available in the CPI database (www.bls.gov/cpi/data.htm).

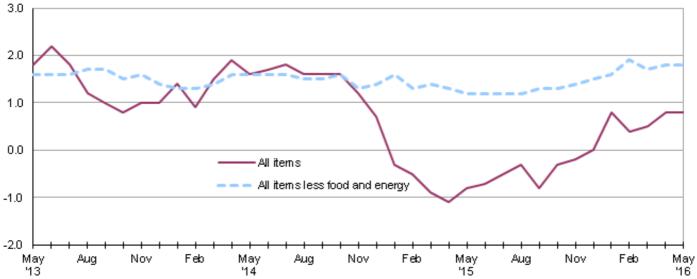

# Consumer Price Index, Midwest Region – May 2016 Prices in the Midwest up 0.4 percent in May and 0.8 percent higher over the year

The Consumer Price Index for All Urban Consumers (CPI-U) in the Midwest rose 0.4 percent in May, the U.S. Bureau of Labor Statistics reported today. The monthly advance was largely attributable to an 8.2-percent increase in motor fuel prices. The broader energy index was 4.6 percent higher over the month. Food prices declined 0.2 percent while the index for all items less food and energy was little changed (0.1 percent). (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

The CPI-U for the Midwest advanced 0.8 percent from May 2015 to May 2016. (See <u>chart 1</u> and <u>table A</u>.) The energy index, which includes motor fuel and household fuels, fell 7.9 percent, but prices for food were up 0.7 percent. Excluding food and energy, the CPI-U rose 1.8 percent over the year. (See <u>table 1</u>.)

Chart 1. Over-the-year percent change in CPI-U, Midwest region, May 2013-May 2016

Source: U.S. Bureau of Labor Statistics.

#### Food

Food prices in the Midwest declined 0.2 percent in May. The index for food at home decreased 0.7 percent while costs for food away from home were up 0.5 percent.

From May 2015 to May 2016, the index for food increased 0.7 percent. Rising costs for food away from home (2.9 percent) were responsible for the yearly advance. Prices for food at home registered their eighth consecutive over-the-year decline, down 0.7 percent since May 2015.

## **Energy**

The energy index rose 4.6 percent in May, following increases of 7.7 and 2.6 percent, respectively, in March and April. As in the previous two months, motor fuel prices were largely responsible for the monthly advance, rising 8.2 percent in May. Costs for electricity rose 2.1 percent and prices for utility (piped) gas service were 0.4 percent higher over the month.

Despite the recent monthly advances, energy prices decreased 7.9 percent from May 2015 to May 2016. Prices for motor fuel and utility (piped) gas service were down 13.4 and 8.5 percent, respectively. Costs for electricity increased 0.8 percent over the year.

## All items less food and energy

The index for all items less food and energy for the Midwest was little changed (0.1 percent) in May. Expenditure categories registering higher prices over the month included medical care services (0.7 percent) and shelter (0.2 percent). In contrast, education and communication and new and used motor vehicles (each down 0.3 percent) were among the expenditure categories posting lower prices over the month.

The index for all items less food and energy was up 1.8 percent from May 2015 to May 2016. A 2.7-percent rise in shelter costs led the advance. Prices for medical care services had the next largest upward impact with a 3.8-percent increase.

The Midwest Consumer Price Index for All Urban Consumers (CPI-U) stood at 226.478 in May 2016. A typical market basket of goods and services that cost \$100.00 in the 1982-84 base period cost \$226.48 in May 2016.

### **CPI-W**

In May, the Midwest Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) was 220.833, up 0.5 percent over the month. The CPI-W increased 0.5 percent over the year.

The June 2016 Consumer Price Index for the Midwest region is scheduled to be released on Friday, July 15, 2016.

#### **Technical Note**

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 6,000 housing units and approximately 24,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at <a href="www.bls.gov/cpi">www.bls.gov/cpi</a> and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at <a href="www.bls.gov/opub/hom/homch17">www.bls.gov/opub/hom/homch17</a> a.htm.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater

volatility than the national index, although their long-term trends are quite similar. NOTE: Area indexes do not measure differences in the level of prices between areas; they only measure the average change in prices for each area since the base period.

The Midwest region is comprised of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 1-800-877-8339.

Services less energy services	280.401	281.089	281.624	2.6	0.4	0.2	

<sup>(1)</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.

<sup>(2)</sup> Index is on a December 1984=100 base.

<sup>(3)</sup> Indexes on a December 1997=100 base.

<sup>(4)</sup> Special index based on a substantially smaller sample.

<sup>(5)</sup> Indexes on a December 1993=100 base.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.
